Abstract:

An industrial waste heat recovery system. A swellable glass that could reduce waste byproducts from fracking. A non-invasive electrocardiographic mapping vest. A professional, turnkey and cost-efficient video broadcasting solution. A web-based highly automated staff management system. Exciting new companies are launching and growing in Northeast Ohio every day. Whether you're interested in starting up your own high growth company, lending your skills to an entrepreneurial venture or just learning about the innovations coming to life in Greater Cleveland, we'll touch on it all at the "Accelerating Entrepreneurship" networking and education event.

Celebrating 125 Years
of Engineering the Future
